FOR IMMEDIATE RELEASE

T.J. Ward with Investigative Consultants International, Inc. Pursues New Lead in Natalie Holloway Case

(03-1-2006) – Investigative Consultants International, Inc. is following up on another lead in the Natalie Holloway case generated by Layered Voice Analysis (LVA) conducted subsequent to and in connection with the PrimeTime interview given by Joran Van der Sloot, aired February 23, 2006.

LVA analysis indicates that Joran provided DECEPTIVE AND INACCURATE answers to the relevant questions throughout the interview.

Joran indicates PROBABLE FALSE, INACCURACY and/or HIGH TENSION LVA readings on all of the relevant questions asked by the reporter about Joran 'killing', or 'seeing' Natalee in 'distress'. None of Joran's responses to the four relevant questions are consistent with a fully truthful and accurate response.

LVA analysis indicates Joran Van der Sloot is deceptive and inaccurate in his account of the circumstances surrounding the disappearance of Natalee Holloway.

LVA analysis indicates Joran Van der Sloot is deceptive and inaccurate in his account of the role he played in the disappearance of Natalee Holloway.

Joran Van der Sloot should be considered a suspect in the disappearance of Natalee Holloway.
